⚙️ Parts Included:

(3) Brackets

(1) 24V Adapter with Type C Plug

(3) Screws

(1) Instruction Manual

(1) Cabinet Light

⚠️ Before You Get Started:

1. The LED cabinet light will only work using the provided 24V adapter with the type C plug.

2. The LED bulb is non-replaceable. If it stops working, you'll need to change out the entire unit.

3. The light cannot be used in damp, high temperature locations.

4. Use a dry cloth to wipe down the cabinet surface before sticking the bracket to the cabinet.

5. Make sure the cabinet light is firmly fixed to avoid accidental falling.

6. Clean the light bar surface when it is turned OFF if the cabinet light is dusty or dirty.

7. Make sure the environment temperature is over 50 F° (or 10 C°) when recharging the light.
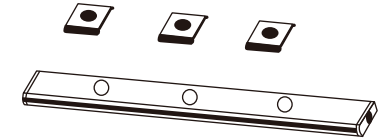

🔧 Installation Manual:

1

Peel the sticker off the back glue of installation brackets.
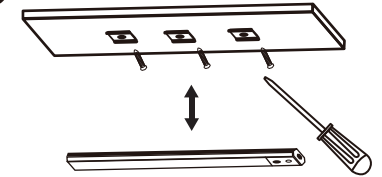

2 Bracket (Magnetic Inside)

Place the 3 brackets on the back of the cabinet light in the positions noted above. The cabinet light has magnetic block inside, so the brackets will easily adhere onto the back of the light.
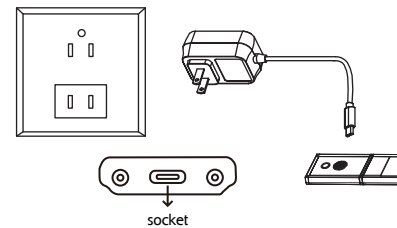

3

Press the cabinet light with attached brackets to your cabinet and apply pressure to ensure the glue is firmly attached.
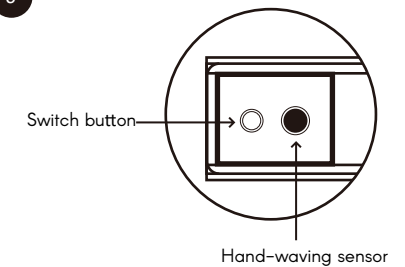

4

If screw fixing is necessary, take off the cabinet light and fix the screws through the hole of bracket, then reconnect the cabinet light.

5

socket

Plug the 24V adapter to a power outlet, connect the Type C plug to the socket of light.
